PROFESSIONAL SUMMARY

Master's student in Industrial Management with a Bachelor's in Mechanical Engineering and 2+ years of experience in industrial pumps. Experience in purchasing operations at Bosch and design engineering at Torishima Pumps. Skilled in supplier coordination, on-site power plant operations, and cross-functional collaboration. Currently gaining hands on experience through university collaborations with Porsche and Hilti in procurement projects. Seeking a Working Student/Internship role in Industrial operations and engineering management.

WORK EXPERIENCE

Torishima Pumps India Pvt. Ltd. – Junior Design Engineer (Engineering)

Sep 2023 – Oct 2025 | Bangalore, India

- **Pump & Power Plant Expertise:** Gained on-site experience at thermal power plants, complex troubleshooting related to pump.
- **Design & Engineering:** Developed precision 3D models and 2D manufacturing drawings using SolidWorks (Certified), AutoCAD, specialized in complex assemblies and technical documentation.
- **Advanced Technical Skills:** Led Reverse Engineering projects by scanning complex components with FARO Arm scanner and redesigning worn parts to ensure they fit into existing assemblies, also redesigned several types of industrial pumps.
- **Standards & Quality:** Ensured full compliance with international engineering standards (ISO, DIN, JIS, ASTM) during technical documentation and design phases.
- **Operational Excellence:** Reduced revision cycles and shop floor technical queries by streamlining internal drawing and design workflows, cutting the gap between design and manufacturing.

Bosch India – Intern, Purchasing Department

Feb 2023 – Aug 2023 | Bangalore, India

- Supported purchasing and supplier management activities.
- Helped track purchase orders, supplier documents, and delivery status.
- Used Excel and SAP for basic data analysis and reporting.
- Coordinated with suppliers, engineering, and internal teams to support smooth operations.
- Assisted in maintaining purchasing records and reports.

EDUCATION

Hochschule Pforzheim – MSc Industrial Management

Oct 2025 – Present | Germany

- Currently working with Hilti on a project to understand their global procurement process and developing strategies to increase profitability to the company.
- Working with Porsche AG on an innovation management project, researching emerging regions for dual supplier strategies and presenting solutions to the team.
- Completed coursework in product development, business management, and AI applications.
- Gained exposure to systems based thinking and digital technologies (networked systems).
- Applied research methods for researching engineering and business problems.
- Coursework: Product development, Business Management, AI Applications, and Digital Networked Systems.

New Horizon College of Engineering – BE Mechanical Engineering

2019 – 2023 | India

- Final-year project: Researched, designed and built a prototype shaft-driven (chainless) bicycle.
- Conducted mechanical testing on Alluminum alloy and data visualization using MATLAB.

SKILLS

Business & Operations

- Purchasing and supplier support
- Researching
- Documentation and reporting
- Coordination with multiple teams

Tools & Software

- MS Excel, PowerPoint, Word, Teams, Outlook (Intermediate)
- SAP
- ANSYS

Technical Background

- Understanding of manufacturing and pump-related processes
- CAD knowledge: SOLIDWORKS CAD Design Professional — Dassault Systèmes certified, Siemens NX, AutoCAD, Geomagic Design X

Programming (basic)

- Python (Machine Learning concepts),
- C, C++
- GitHub (version control)
- MuJoCo
- MATLAB

Languages

- English: Fluent
- German: A2 (Actively learning)
